

STAGE A, DESIGN - Session 8: Building a Prototype

Extension 8: Patent Application

OBJECTIVE: If necessary, protect your company's product design using the patent process.

If your company has a unique product design that needs to be patented, complete 8.1 PATENT APPLICATION by providing a detailed illustration and description of the design

Submit the patent application to your teacher along with the \$3BB application fee. Your teacher will decide which patents are approved.

Approved patents will be posted in the classroom and only the company that owns the patent can use that specific design.
